PERSONAL PROJECTS

SocialShare: A Socialmedia App (09/2023 - Present)

- **User Authentication and Verification:** I played a pivotal role in designing and implementing a robust user authentication system. This included user registration, login, and email verification processes. This was critical to ensure the security and trustworthiness of the platform.
- **User Engagement:** To enhance user engagement, I oversaw the implementation of features that allowed registered users to create and share posts. This involved creating a seamless user experience and providing an interface for liking and commenting on posts.

CryptoSteller (03/2023 - Present)

- It Provides Latest Crypto News and Crypto Prices realtime
- The application is deployed using CI(Continuous Integration) on Vercel : <https://cryptosteller.vercel.app/>

Ecourtflow (10/2023 - Present)

- **Administrative Dashboard:** Efficient management of clerks and judges, ensuring the seamless functioning of the case management system.
- **Clerk Portal:** Streamlined addition of cases with necessary documentation and assignment to the most available judge for prompt processing.
- **Judge Dashboard:** Categorized case viewing by severity, enabling prioritized handling and efficient case review. Project Link: <https://hackathon-n2ci.vercel.app/>
